

## Instructions for LOEX 2009 “Encore” Virtual Session Archive

Host Site: <http://www.emuonline.edu>

### **Java Test**

(If you are using a Mac, and have **OS X 10.1** or higher, skip this “Java Test” section)

Go to the Elluminate Product Support page: <http://lluminate.com/support/>

- This screen (see example below) will indicate if you have Java installed.  
If you do not have at least version 1.5, you will need to follow the instructions to install Java that can be found here, <http://www.java.com/en/>

### First Time Users

#### Step 1 - Java software check

 Congratulations, you appear to have the required software to launch Elluminate Live!

Java version you are running:  
1.6.0\_13 Sun Microsystems Inc.  
Detailed pre-requisite information can be found [here](#).

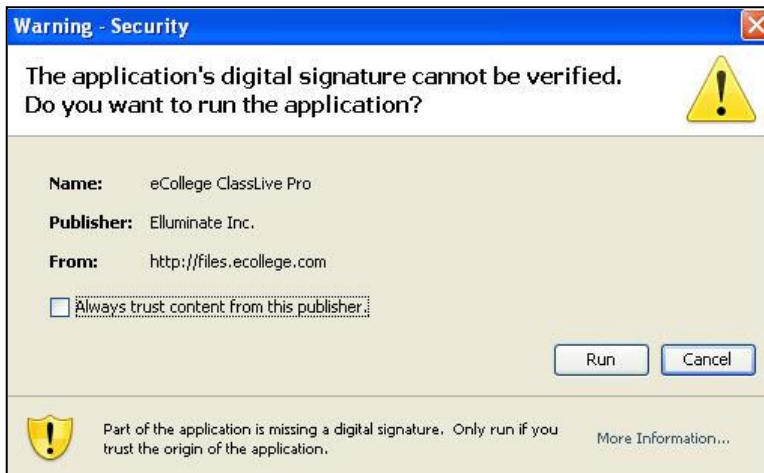

#### Step 2 - Complete your setup

Join the [Configuration Room](#) to test your connection and configure your audio.

#### Step 3 - Learn more about Elluminate Live!

- ▶ [Online Orientation](#)
- ▶ [Quick Reference Guide](#)
- ▶ [Recorded Introduction](#)

You **should** see (depending on your browser) the “Warning – Security” box (see below) saying “The application’s digital signature cannot be verified. Do you want to run the application?” If so, click on **Run** and make sure the “Always trust” checkbox is checked.

After you confirm that Java is correctly installed, go on to **\*\*TO ATTEND THE MEETING\*\*** section of this document

- There is no need to do **Step 2 – Complete your setup** unless when you go through the steps under “TO ATTEND THE MEETING”, you have audio or connection problems.

### **\*\*TO ATTEND THE MEETING\*\***

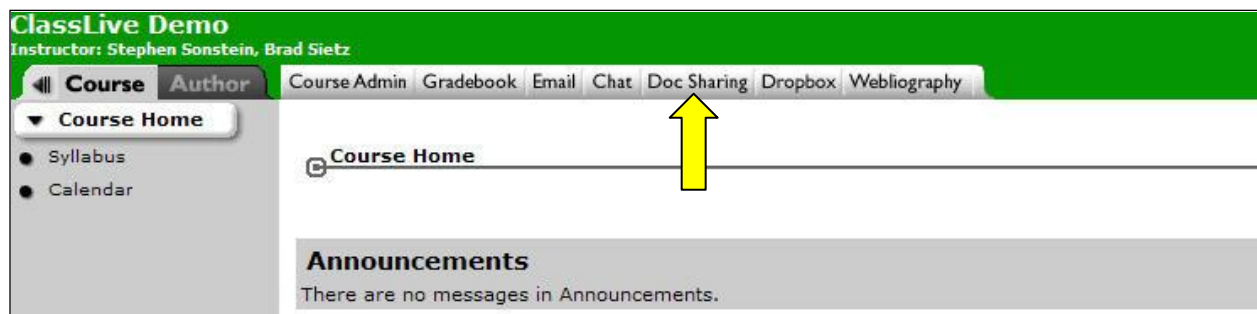

1. Click the following URL:  
<http://www.emuonline.edu/>
2. At the EMU-Online Login window on the left side of the screen, type in your Login ID and your Password (sent to you via email):

- Under the heading **Elluminate (2009)**, click on the blue link to the “course” you would like to view, e.g., “**LOEX May 14 Encore – Wikipedia, iPods, and chickens**”

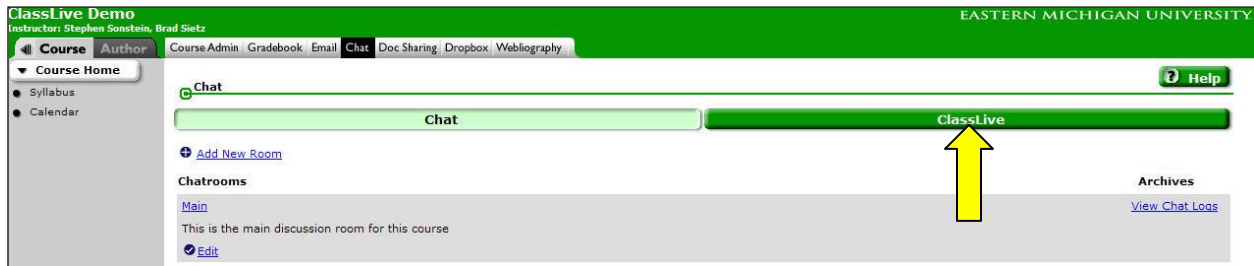

- Click on the grey **Doc Sharing** tab at the top part of the screen and download the files, if any, that apply to your selected session (not all sessions have handouts)

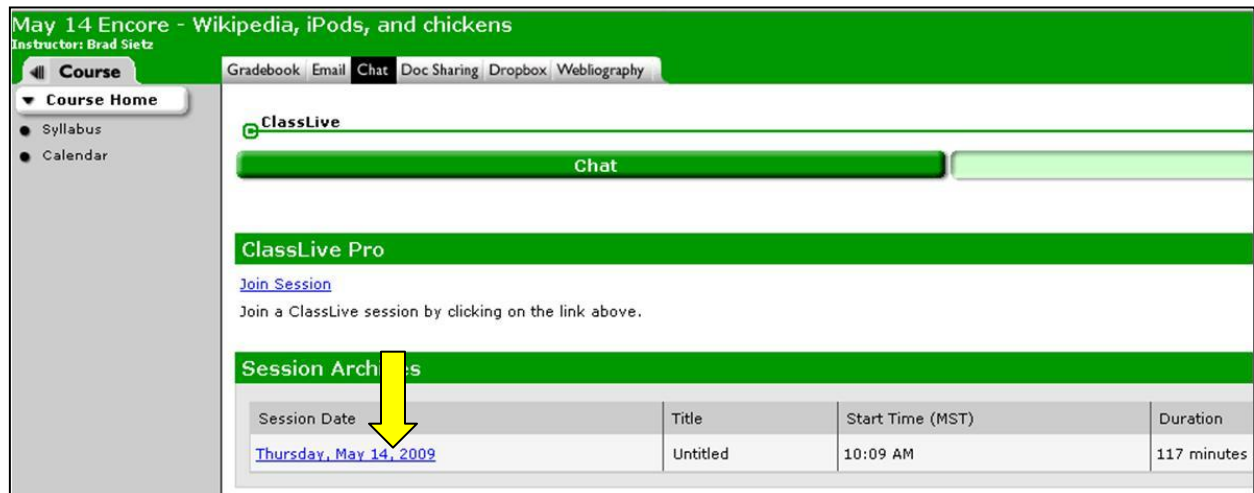

- Click on the grey **Chat** tab at the top part of the screen

6. Click on the green **ClassLive** button toward the upper right part of the screen.

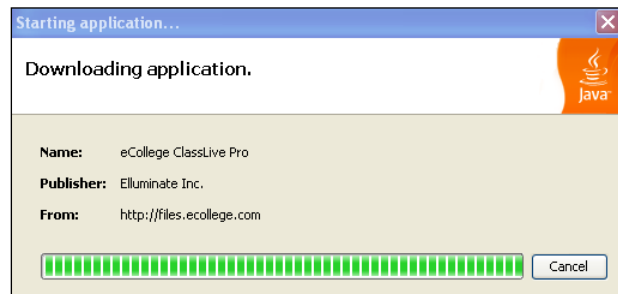

7. Under the Session Archives heading, click on the link under **Session Date**.

A Java Web Start window will appear and will automatically download the Java application (a .jnlp file), starting an Elluminate session.

Make sure your **pop-up blocker** does not block this .jnlp file.

**You are now ready to start your Encore!**
