

FROM CLASSROOMS TO LEARNING SPACES

New and Remodeled Library Instruction Rooms

LOEX 2012 Columbus, OH

Jason Vance & Kristen West
Middle Tennessee State University

The presenters will report on the latest trends in library classroom design by examining newly constructed, recently-renovated, and reconfigured library teaching spaces in a variety of academic libraries. This session will offer advice gleaned from conversations with librarians who teach in these newly (re-)designed spaces and offer tips about the planning process. This session will also include floor plans and photographs from some newly designed library teaching classrooms that will help you transform your library classroom into a dynamic teaching and learning space.
