Course Details

- 7 Weeks, 2 hours per week, 1 credit
- Applied Liberal Arts Program in the College of Literature, Sciences, and the Arts
- "Lab" Based
- Sophomore Standing or Above
- Graded
- 12-15 students
- Fall 2017, Winter 2018, Fall 2018
The Course Proposal
Course Development
Course Developers

- Doreen Bradley, Director of Learning Programs and Initiatives
- Jo Angela Oehrli, Learning Librarian
- Hailey Mooney, Psychology & Sociology Librarian
- Shevon Desai, Communication & Information Studies Librarian
Class Themes

- Strategies for Identifying “Real” News: Evaluating Sources and Determination of Source Credibility
- Journalistic Integrity and News Production
- The Information Landscape, Media Fragmentation and Social Media
- Fact-checking Statistics and Data
- Is Reality Subjective?
Course Proposal/Development: Challenge

How do we teach everything we want to with the time constraints?
The Class
The Class: Instructional Approach

- Critical thinking exercises and active learning activities are key to the success of the class.
- Examples of news stories allow students to apply course concepts. Use them freely.
- A Socratic and constructivist approach was applied to the instruction of the course.
- Peer-to-peer learning is incorporated throughout the course.
Course Content

- Flexible syllabus
- Journals
- Assignments
- Final Project
Grades

[Image: Weight evenly distributed for grades between final project, participation, assignments]
“The journals are working well because they allow you to see what we are doing with our class time even if we don't speak up.”

“I love the openness of the instructor and the private journals we have that are included in our participation. Sometimes a point I would love to make in class is not something I can go as in-depth as I'd like to verbally, so I will put it in my journal so it doesn't go unacknowledged that I have these thoughts.”
The Class: Setting Up Successful Class Discussions
Journal: What are some examples of bad class discussions?
Discussion about discussions: Respect
“I think the most important thing to understand is that everyone had different backgrounds going into this class. This means we all had different majors, different ages, and different interests for why we’re taking this class. That creates a small think-tank-like community where we can be completely open and honest with our thoughts and can hear different opinions, thoughts etc.”
Tools and Activities

- Strategy tools (IFLA, Google Chrome extension)
- Fact Checking Websites (Politifact, Snopes)
- Bias Websites (allsides.com)
- Media professional panel
- Issues & Controversies and CQ Researcher
- Scholarly Databases
- Blue Feed, Red Feed
The Class: Activities

- Peer-to-peer Learning
- Conversational -- Room Set Up in a Circle
- See the web site

SOME HIGHLIGHTS
FROM THE IFLA INFOGRAPHIC ...

[Image that reads, “Check the Date: Reposting old news stories doesn’t mean they’re relevant to current events”]
ONE MORE TIME:
You should care just as much about
WHAT IS NOT in the news
as WHAT IS IN it
“But, how am I supposed to know what’s NOT in the news?”
[Infographic showing many news outlets. The creator tries to identify the political perspective of the news outlet]
“Many of the news sources in the middle are fee-based. Does that mean that only people who can afford it can get reliable news?”
Examples, Examples, Examples
Did anyone hear and/or see a meteor or a giant bang or explosion in the metro Detroit area?
Graph entitled Gun Deaths in Florida. The y axis is zero at the top of the infographic rather than at the bottom so that years in which gun deaths increased appear to be years in which gun deaths decreased.
"Pence: ‘Michelle Obama Is The Most Vulgar First Lady We’ve Ever Had’"
[Instagram Image from a U.S. Army football game. Players are kneeling on the field. The caption reads, “331 likes. Livingthelifeof_blackgirlmagic Um... that's the US Army football team. So are they unpatriotic too. Just asking for a friend?” The caption ends with 6 Faces with Tears of Joy emojis]
The Class: Successes
Critical Thinking
“The class is discussion and question driven, which I think is powerful. We’re not being told how to find fake news, but rather being given the tools and thought processes to analyze it ourselves. This differentiates the class from other classes as we can’t just memorize the course material, we have to actually come up with our own ideas and own opinions about things which is awesome.”
Student Driven
“This course is unique because it doesn’t teach us some specific knowledge but more of a way of critical thinking, learn how to identify fake news, reflect on our experience, common sense, opinion and biases.”
The Class: Challenges
Challenges: Our Ever Changing World

- Fake news is proliferating and you want to acknowledge that
  - Las Vegas shooting
  - Houston flood
  - Stoneman Douglas High School
- Research is evolving and you want to incorporate it ([MIT study](#))
Challenges: The Amount of Course Topics

“I wish that we could sometimes slow things down because I love a lot of the topics but we go by so briefly. Maybe the speed of the class is because it's a mini course.”
Challenges: Bias

- Class discussion activity
- Build rapport
- Journals allow students to express disagreement that may or may not be based on bias
- Use examples from across the political spectrum
- Try something and if it doesn’t work, keep trying!
  - Center for Research on Learning and Teaching
  - Library Diversity Officer
- Students will bring up bias on their own before you get to it later in the semester (Blue Feed, Red Feed; Climate Change activity in Week 3)
One-Shot Applications
One Shot Applications

- Compare Blue Feed Red Feed to an “issues” library database: How is what you find on the internet different from what you find in a library database
- Use one of research examples in Week 5’s content about data literacy as an ice breaker/anticipatory set
- Use fake news as a search topic: Students love talking about it and it’s interdisciplinary
- Evaluating Sources: Use bias exercises to help students define and illuminate bias
- Re-envision the journal idea: Use free-writes and comment on them
Why is this important?
This is a class about engaging with all news
This is a class about figuring out what’s going on in the world.
“I want educators to understand that this class is not about just fake news and how to be less gullible. I see it as a complex discussion about the nature of being a person in today’s climate and who is constantly exposed to media from all sources- it’s a way for people from all walks of life to figure out how to navigate this complex world and modify their perspective to understand how the information they are presented with is going to help them and enrich them, but also how to be skeptical of what they hear and learn so they can be a more educated citizen who understands their world and how to understand everyone elses. I took this class because as a member of a group who is often targeted by misinformation and I want to help people understand that what they are reading is fake and is not what reflective of me or anyone else.”
