

What's a Jockey without a Horse?

Librarians & Faculty Building Community
around the Framework

Rachel Stott | Auraria Library | rachel.stott@ucdenver.edu

Things to consider when planning faculty outreach...

- You don't have to completely understand the Framework to start talking about it.
- You can have a successful workshop series using minimal resources and a \$0 budget.
- You will likely learn as much from the faculty as they learn from you.
- You will build a greater sense of shared community upon discovering people outside the library who have similar questions when it comes to teaching information literacy.
- You will get some good ideas for next steps.
